

A new chapter...

In chapter '6 Economics for small displays' you will find subjects which can be displayed on mobile devices. The files allow you to display and read a subject without having to scroll up/down or to the right/left. At the end of all files you find a file covering all subjects. An 'Acrobat Reader' must be installed.

The files have been tested successfully on the following devices:

- a 7-inch tablet
- an ebook-reader
- a mobile with a diagonal of nearly 9 cm

At the moment only subjects covering microeconomics are displayed (6.1). Until January 2013, the chapter will be completed by subjects on macroeconomics (6.2).
