

## Pendenza di una linea retta 1 (I30b)

⇒ Come si possono caratterizzare i seguenti tipi di pendenza? Positiva, negativa, 0, infinita

| Tipo 1                                                                                                                                                                                                                                                                                   | Tipo 2                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  A Cartesian coordinate system with a vertical Y-axis and a horizontal X-axis. A straight line is drawn from a point on the Y-axis down to a point on the X-axis, sloping downwards from left to right. |  A Cartesian coordinate system with a vertical Y-axis and a horizontal X-axis. A horizontal straight line is drawn parallel to the X-axis, intersecting the Y-axis at a positive value.                       |
| Tipo 3                                                                                                                                                                                                                                                                                   | Tipo 4                                                                                                                                                                                                                                                                                          |
|  A Cartesian coordinate system with a vertical Y-axis and a horizontal X-axis. A vertical straight line is drawn parallel to the Y-axis, intersecting the X-axis at a positive value.                 |  A Cartesian coordinate system with a vertical Y-axis and a horizontal X-axis. A straight line is drawn from a point on the Y-axis up to a point in the first quadrant, sloping upwards from left to right. |
